

AKSHAT KUMAR

Product Intern | PRDs & Feature Specs | Consumer Tech | SQL & Analytics | Figma | Jira
Gurugram, Haryana | +91-7599012737 | akshatk1997@gmail.com | linkedin.com/in/akshatk1997

Professional Summary

Product-minded engineer with a B.Tech in Computer Science and an MBA in AI & Data Science who has shipped a live, end-to-end product — Qiplo (qiplo.vercel.app), a deployed AI SaaS platform with 8 functional modules, built by writing PRDs, collaborating with engineering, designing user flows in Figma, and tracking feature performance with SQL analytics. Strong interest in consumer tech, wearables, and electronics products, with hands-on experience in market and competitor research, user feedback synthesis, A/B testing, backlog management using Jira, and go-to-market planning. Curious, self-driven, and genuinely excited about working on products used by millions.

Key Skills

Product Core: PRD Writing · Feature Specs · User Stories · Product Roadmapping · Backlog Management · Sprint Tracking · Go-to-Market Planning

Analytics & Data: SQL (Product Analytics) · Feature Performance Tracking · A/B Testing · User Feedback Synthesis · KPI Definition · Power BI

Design & Tools: Figma · Wireframing · Prototyping · Jira · Notion · MS Office · Google Workspace

Research: Market & Competitor Research · Consumer Tech Domain · User Research · App Review Analysis · Trend Identification

Professional Experience

Marketing & Product Coordination Intern — BlueFlute Software Pvt. Ltd. June 2026 – July 2026

- Contributed to go-to-market execution for product initiatives, as measured by on-time delivery across all launches acknowledged by the CEO, by coordinating cross-functionally across design, engineering, and marketing teams.
- Gathered and synthesised user feedback from campaign interactions and customer touchpoints, translating insights into structured reports for stakeholders and identifying improvement areas for the product team.

Product Analyst & Community Lead — Franco Kernel Android Community 2020

- Managed sprint-equivalent release cycles for system software builds — writing structured test criteria, tracking backlog progress using issue management tools, and collaborating with developers to keep execution on schedule.

Product Projects

Qiplo — AI Customer Retention SaaS Platform (Live: qiplo.vercel.app) 2026

- Shipped an end-to-end product with 8 functional modules — wrote PRDs and feature specs for each module (What-If Sandbox, Qiplo Copilot AI, CRM Integrations, PPTX Exporter, A/B Test Tracker), defined user stories for Sales, Support, Executive, and Manager personas, and managed the full feature lifecycle from ideation to deployment on Vercel.
- Analysed product and user data using SQL-backed analytics to track feature performance, identify usage patterns, and surface retention insights — exporting findings to Tableau, Power BI, and Excel for stakeholder reporting.
- Built and validated a Tabular Hybrid Transformer ML model, tracked model performance metrics (Accuracy, Precision, Recall, ROC AUC), and used SHAP feature importance to explain predictions to non-technical stakeholders.
- Integrated CRM webhooks (Salesforce, HubSpot, Stripe) and designed a go-to-market-ready compliance audit system (SOC 2/ISO 27001) — applying consumer product thinking to enterprise deployment requirements.

AI Chatbot — Prompt Design, A/B Testing & Feature Performance 2025

- Wrote feature specs and defined the user journey for a conversational AI product, conducted market research on competitor chatbot approaches, and supported A/B experimentation from hypothesis framing through to results analysis.
- Tracked feature performance KPIs (resolution rate, response time, satisfaction score) using structured data analysis, synthesised user feedback patterns, and presented findings as stakeholder-ready reports.

Education & Certifications

MBA — Artificial Intelligence & Data Science 2025 – Present
Chandigarh University

B.Tech — Computer Science Engineering 2019 – 2023
Dr. A.P.J. Abdul Kalam Technical University (AKTU)

Google UX Design Professional Certificate 2026
User Research · Figma Wireframing · Prototyping · Feature Feedback Analysis

Machine Learning Using SAS Viya 2026
Feature Performance Modelling · Product Analytics · A/B Test Data Interpretation
